RE:

Notification by Rocky Flats Environmental Technology Site (RFETS) to invoke the Rocky Flats Cleanup Agreement Standard Operating Protocol (RSOP) for Facility Disposition for Demolition of Buildings 449A and 453

Dear Mr. DiSalvo:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the "Division"), has reviewed your February 10, 2003 letter and accompanying notification package received on the same day, notifying us of your intent to utilize the RSOP for Facility Disposition for the demolition of Buildings 449A and 453. The Division has also reviewed your letter dated February 5, 2003 documenting the follow-up characterization of the overhead structures inside Building 449A for beryllium and the decontamination activities and post-decontamination sampling results for beryllium in Building 453. Based on this additional characterization information and the information provided in the previously submitted RFETS Reconnaissance Level Characterization Report (RLCR) for the 444 Cluster Closure Project Buildings 427, 449, 449A, 449C, S449, 453, 454 & 457 Pad (Revision 0, dated September 23, 2002), the Division hereby concurs that the characterization of Buildings 449A (except for the beryllium contaminated cargo container on the west side of this structure) and 453 meet the requirements of a Pre-Demolition Survey (PDS) and that these buildings meet the unrestricted release criteria specified in the RSOP for Facility Disposition. Demolition of Buildings 449A and 453 may proceed in accordance with the requirements of the RSOP for Facility Disposition, except that the beryllium contaminated cargo container located on the west side of Building 449A must be disposed of appropriately as beryllium contaminated waste. If you have any questions regarding this correspondence please contact me at (303) 692-3367 or James Hindman at (303) 692-3345.
